- ◆ **Automatic fitting layout**
- ◆ **Library of 165 fittings**
- ◆ **Reports & Labels**
- ◆ **Automatic & Manual Nesting**
- ◆ **Connectors and Seams**
- ◆ **DXF Output**

### The power you need with the features you want!

Fitting Layout for Windows gives you 165 rectangle, round and oval fittings and full processing reports. Fitting Layout gives you everything you need to design, input, nest and DXF out your own fitting jobs.

### "One-window" fitting selection, workbench, and nesting

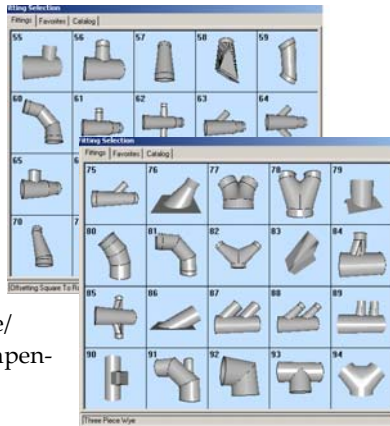

By using powerful Windows' features, Fitting Layout makes it easy to select your fittings, input the dimensions, quantity and material type, and then see an actual 3D preview of the fitting and the flat layouts of the parts. One click of the auto-nest button nests the parts to optimize material usage and then you can view the nested plates as they will be cut.

You can even modify the finished patterns for special applications by using Fitting Layout's powerful "Workbench" drawing tool. You can place holes, chop pieces, scale or stretch them, and even merge two patterns together.

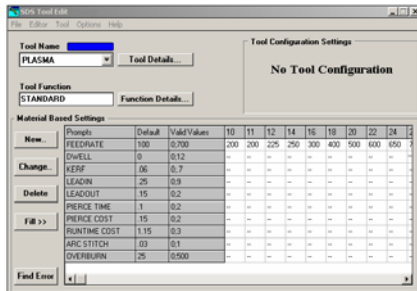

## Comprehensive library provides ultimate flexibility

The Fitting Layout's library includes 165 basic and complex fitting shapes including cones, offsets, elbows, wyes, branch fittings and square-to-rounds. Capabilities such as mitering, reducing, concentric/eccentric dimensioning are available as well as selectable seam placement, selectable hole sizing, and inside/outside diameter material compensation.

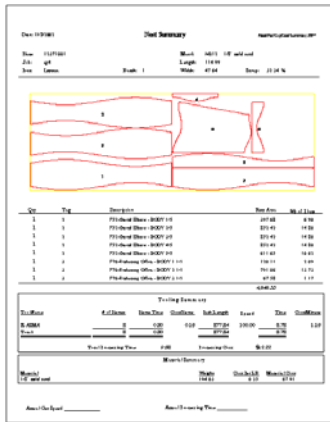

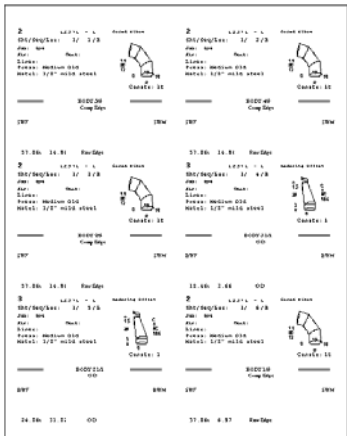

## Powerful machine tool configuration

ShopData's Tool Edit module manages all of your tools and process parameters like pierce cost, pierce time, feedrate, runtime cost, etc. can be controlled, automated, and integrated directly with processing reports.

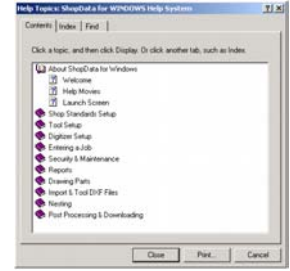

## Ultimate customization for labels & reports

(Requires Rectangular or Shape Nesting)  
Through the dynamic interactive capabilities of Microsoft Windows®, you can design your own ShopData reports & labels! By interfacing Microsoft Access® and Seagate Crystal Reports™ with ShopData for Windows, you have the tools you need to extract critical data for estimating, production, shipping, in ventory management, purchasing and more.

## On-line help

There is visual on-line help for all features, plus help "movies" which actually step you through specific system functions.

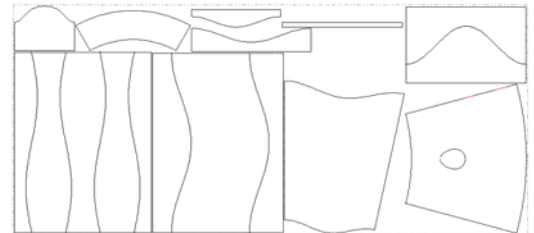

## Personalized training & support

ShopData backs its software with 120+ collective years of metal fabricating experience and 25 years in business. No cutting software company has more expertise! We offer hands-on, customized training at your site or ours. Take advantage of our 24/7 phone support through the annual ShopSource Support and Upgrade program.

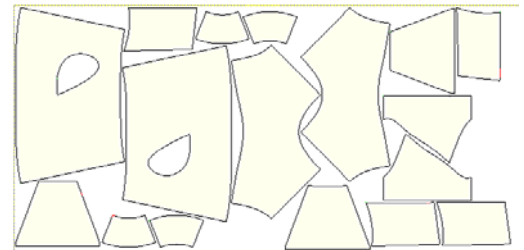

## Optional Automatic Rectangular Nesting & Manual Nest

Fitting Layouts' rectangle nesting automatically nests parts on multiple sheet sizes. Other nesting features include chain cutting, move & bump manual nesting with mouse-controlled part rotation, feature avoidance, and part tabs.

## Optional Advanced Shape Nest

Fitting Layout's shape nest automatically lays parts side by side and rotates them to match interlocking angles and contours. Part "pairing" maximizes material usage through piece placement. Fitting Layouts nests parts inside internal cutouts for the highest nesting precision. Other nesting features include chain cutting, move & bump manual nesting with mouse-controlled part rotation, feature avoidance, and part tabs.
